"WHERE ARE MY CHILDREN!"

"WHERE ARE MY CHILDREN!"

The subject of birth control which is being given so much control which is being given so much control which is being given so much control which is being given so did students of the propagation of our race, has been used as the theme for "Where Are My Children" a photodrama produced by Miss Lois Weber, which is being shown at the Gircian today and tomorrow. Miss Weber has handled this delicate subject in a manner which is bound to provoke no end of discussion.

It is undoubtedly true, disciples of the old-fashioned school admit, that many women are unfit to become mothers. Historting their figures to meet the dictates of fashion; indulging in pastimes tending to unsex them and render them masculine; or even the unavoidable ills due to physical weakness or heredity, are responsible for many extreme cases. But these are the exception, not the rule.

Mother love is implanted deeply within the breast of every true woman. The appeal of sex to sex, and the wonderful love that springs, and grow, and blossoms to its full fruit in the restring of a home and children, is one of natures wiso rulings to make all right with the world. These are the dictates that will control race propagation, and they are laws too sarried to be violated. It is to this end that "Where are My Children?" brings home to us a never to be forgotten truth and a great moral lesson.—Adv.

It is a realistic and gripping presentation of the theory that those who have passed away from this world return in spirit to right wrongs. The story is strongly and pleasingly told and carries a remainte thread throughout.—
